Rumania has been divided into nine trusts with fixed territorial limits for oil exploitation purposes. At present the trusts are composed as follows:

1. Trust No. 1. Main office in Floesti. Exploitation zones are composed of the districts of Floesti, Campina, Floresti and Buzau.
 - a. Floesti oil field. Numerous wells in operation and the existence of more than 600 derricks has been confirmed.
 - b. Campina oil field. Located northeast of the city and extends about two kilometers into the zone between the Prahova and Dofitana Rivers. From 50 to 60 wells are in operation including 30 with low output.
 - c. Berca oil field. Located 22 kilometers north-northwest of Buzau. The field covers a zone 5 by 2 kilometers in area. This field has been exploited for some time and there are 30 wells in operation. Daily production is about 350 tons.
 - d. Arbanasi oil field. Located about 15 kilometers north of Arbanasi and extends over a zone about 4 by 3 kilometers in area. About 20 wells are in operation and daily production is 20 to 30 tons. New drillings have been made recently but with negative results.
 - e. Urlati oil field. Located 18 kilometers east-northeast of Floesti and covers an area of about 10 by 2 kilometers. Approximately 400 wells are in operation with a daily production of 800 to 900 tons.
 - f. Sarata-Monteoru oil field. Located in the neighborhood of the northern slope of Monteoru Mountain in a locality 12 to 13 kilometers west of Buzau and about 6 kilometers north of the Floesti-Buzau railroad. Two wells are in operation with a daily production of 50 to 60 tons.

2. Trust No. 2. Main office at Moreni. Exploitation zones are composed of Moreni, Baicoi, Boldesti, Bustenaria, Margineni, Tintea, Zilisteanca, and Pacureti.
 - a. Moreni oil field is located northwest of Moreni and covers a zone about 15 by 5 kilometers in area. Daily production is 800 to 900 tons.
 - b. Baicoi oil field is located northeast of the village and includes an area of approximately 12 by 4 kilometers. About 160 wells are in operation with a daily production of 900 to 1,000 tons.
 - c. Boldesti oil field extends around the village covering an area of 10 by 3 kilometers. About 130 wells are in operation with a daily production of 600 to 700 tons.
 - d. Bustenaria oil field is located between Telaga and Bordeni.
 - e. Pacureti oil field is located between Magurele and Poiana.
3. Trust No. 3. Main offices in Bodesti. Exploited zones are composed of the areas around Bodesti, Barzesti and Stoenesti.
4. Trust No. 4. Main offices at Piatra Neamt. Exploitation zones are composed of the area around Piatra Neamt, Moinești, Bacau, and Tazlau.
 - a. Moinești oil field. More than 500 wells are in operation with a daily production of 1,000 tons. Exploitation of 1,000 more wells is considered possible. This field is connected by pipeline with the Darmanesti refinery.
 - b. Zames oil field is situated in a locality 5 to 6 kilometers northwest of Moinești. About 100 wells are in operation. The field is connected by pipeline with Moinești.
 - c. Poiana oil field is located 4 to 5 kilometers north of Bacau. Four wells are in operation including two that were abandoned in 1935 and reactivated in 1951.
 - d. Solont oil field is located about 10 kilometers north of Moinești. The field is connected by pipeline with the Moinești refinery. About 15 wells are in operation.
5. Trust No. 5. Main offices at Targoviste. Exploitation zones include the area around Targoviste, Podul, Mihai-Bravu, Viforata, Aninoasi, Doicești, Dragomirești, and Cazaci.
 - a. Targoviste oil field extends directly northeast of the city and covers an area of about 5 by 2 kilometers. About 100 wells are in operation with a daily production of 1,200 to 1,500 tons.
 - b. Gura Ocniței oil field is about 10 kilometers east of Targoviste. This field also includes the Rasvadu and Ochiuri wells with a total area of 16 by 6 kilometers. About 100 wells are in operation with a daily production of 500 to 600 tons.
 - c. Suta Seaca oil is located about 15 kilometers southwest of Targoviste. It extends over an area of about 3 by 3 kilometers. About 50 wells are in operation with a daily production of 1,300 tons.

- d. Doicești oil field is located south of the city. About 100 derricks have been erected. The field is connected by pipeline with Floești.
- 6. Trust No. 6. Main office at Târgoviste. Exploitation zones include Pitești, Gaesti, Golești, Cerbu, Margineni, and Bucsani.
 - a. Pitești oil field. Exploitation began in 1951.
 - b. Gaesti oil field is located in a wooded area directly northeast of the city. About 100 wells are in operation. The field is connected with Târgoviste by a double pipeline, running in a trench beside the Gaesti-Târgoviste highway.
- 7. Trust No. 7. Main office at Valea Caselor. Exploitation zones include the area around Valea Caselor, Padureni, Garleni, and Cobia.
 - a. Cobia oil field. Extraction began in May 1952 and about 700 wells are now in operation with a daily production of 50 tons. This field is a part of the rich, recently exploited oil-bearing zone which extends from Suta Seaca through Cobia and Garleni to Valea Caselor. It is about 24 kilometers in length and 2 to 3 kilometers wide.
- 8. Trust No. 8. Main office at Târgu-Jiu. The trust was established in 1953 and includes the area around Târgu-Jiu, Gorj, Pesteana de Jos, Balteni, and Sacol.
- 9. Trust No. 9. Main office at Ramnicul Valcea. The trust was established in 1953 and includes the area around Ramnicul Valcea, Bleici, Dumnesti, Calimanesti and Babeni.
